

LXG-103

(Liquid Xanthan Gum)

DESCRIPTION:

LXG-103 is a high performance liquid xanthan gum. The bio-polymer is suspended in synthetic oil that passes the LC-50 toxicity test.

LXG-103 disperses easily in the mud, without "fish eye" formation and loss of non-dispersed polymer.

LXG-103 provides Non-Newtonian flow properties and low shear viscosity in all type of systems.

PHYSICAL CHARACTERISTICS:

Appearance:	Viscous beige color liquid
Specific Gravity:	1.0g/cc
Active percentage	48%

Advantages:

Disperses easier than the powder Xanthan Gum
Provides suspension without the addition of solids
Stable up to 250 ° F

Packaging:

5 gallon pails (32 per pallet) ,
