

PEG-509 TREATED GILSONITE

PKG: 50#/50

DESCRIPTION

PEG TREATED GILSONITE is a natural hydrocarbon resin that is specifically produced for water-based drilling fluid applications. It used for borehole stability and fluid loss control.

PROPERTIES, TYPICAL

Appearance	Dark brown powder
Specific gravity, g/cc	1.04 – 1.10
Softening point*, °F	320 – 340 (160 – 171°C)

* R&B, pre-melt method

SCREEN ANALYSIS, TYPICAL (PULVERIZED)

U.S. MESH	20	50	100	200
% RETAINED	0	0.5	1.5	18.0
