

PEG-607-07 LIQUID PHPA

PKG: 40# PAIL/32

DESCRIPTION

PEG LIQUID PHPA is a proprietary aqueous emulsion of anionic polyacrylamide/polyacrylate copolymer used to stabilize clay and shale formations and as a viscosifier. PEG Liquid PHPA can be used in fresh or brackish waters. PEG Liquid PHPA mixes easily and requires minimum shear to achieve full effectiveness.

PROPERTIES, TYPICAL

Appearance	Thick opaque white liquid
Specific gravity, g/cc	1.04
pH, 2% in water	6-8
Freeze Point, °F	5.0

ADVANTAGES

Reduces bit-balling

Aids in lubrication

Increases the yield of Bentonite

Increases viscosity without adding solids

Non-fermenting
