

PRODUCT INFORMATION

PRIME SEAL 306

DESCRIPTION:

PRIME SEAL 306 is a proprietary carbon based material which has been selectively sized to achieve optimum particle size distribution for plugging of down-hole porous formations. PEG-SEAL is thermally stable and non-expansive, has a neutral pH and does not adversely affect mud properties.

PROPERTIES, TYPICAL:

Appearance: : Granular gray/black material

Bulk Density: 52 lb/ft³

SCREEN ANALYSIS, TYPICAL % RETAINED

| U.S. MESH | 30 | 60 | 100 | 200 | 325 | Pan |
